

Supplementary Data

Title of the manuscript: “Residential proximity to industrial pollution sources and colorectal cancer risk: a multicase-control study (MCC-Spain)”.

This document is available as supplementary data for inclusion as online documentation. It includes:

- a) Appendix A, showing the description of the risk gradient analysis (assessment of the existence of radial effects near industrial facilities).
- b) Table S1, showing the list of industrial groups, together with their E-PRTR categories, and number of installations by industrial group and province.
- c) Table S2, showing the sensitivity analysis with the characteristics of included and excluded colorectal cancer cases.
- d) Table S3, showing the odds ratios of colorectal cancer by industrial distance and industrial group.
- e) Table S4, showing the odds ratios of colorectal cancer by industrial distance and industrial group, for the sensitivity analysis with only individuals living in their current residence for ≥ 10 years (long-term residents).
- f) Table S5, showing the specific pollutants that can be released by the facilities to both air and water, according to the industrial groups.
- g) Table S6, showing amounts (in kg) of carcinogens (IARC classification) and other toxic substances released by the facilities in the study area in 2009, grouped by industrial sector.
- h) Table S7, showing the odds ratios of colorectal cancer for ever-decreasing radiuses within a 30-kilometer area surrounding each industrial installation, both overall and by industrial group, for the sensitivity analysis with only individuals living in their current residence for ≥ 10 years (long-term residents).
- i) Figure S1, showing a flow chart displaying the selection process of colorectal cancer cases and controls.
- j) Figure S2, showing the box-and-whisker plots with the years of commencement of operations of the 134 industries studied, according to the industrial group.

- k) Figure S3, showing the odds ratios of colorectal cancer by groups of carcinogenic and other toxic substances with statistically significant results and a number of cases and controls ≥ 10 , for the sensitivity analysis with only individuals living in their current residence for ≥ 10 years (long-term residents).
- l) Figure S4, showing the odds ratios of colorectal cancer by specific pollutant with statistically significant results and a number of cases and controls ≥ 10 , for the sensitivity analysis with only individuals living in their current residence for ≥ 10 years (long-term residents).

Analysis 5 (assessment of the existence of radial effects near industrial facilities)

The risk gradient analysis near industrial installations was confined to an area of 30 km surrounding each installation, and the ORs were estimated using mixed multiple unconditional logistic regression models, as follows:

- a) *All industries as a whole (all sectors)*: for each subject i , a new variable “*minimum distance_i*” was defined as:

$$\text{minimum distance}_i = \min\{\text{industrial distance}_{ij}\}_j$$

$i=1, \dots, 3505$ subjects, $j=1, \dots, 134$ facilities

where *industrial distance_{ij}* is the distance between subject i and facility j . This new explanatory variable was categorized in concentric rings (0-1, 1-1.5, 1.5-2, 2-2.5, 2.5-3, and 3-30 km as reference). This was included in the models as both a categorical and a continuous variable, thereby making it possible for: the effect of the respective distances to be estimated by the former; the existence of radial effects to be ascertained by the latter (rise in OR with increasing proximity to an installation); and, by applying the likelihood ratio test, the statistical significance of such minimum distance-related effects to be computed.

- b) *By industrial group*: for each subject i and industrial group k , 22 new variables “*minimum distance_industrial group_{ik}*” were calculated as:

$$\text{minimum distance_industrial group}_{ik} = \min\{\text{industrial group distance}_{ij}\}_j$$

$i=1, \dots, 3505$ subjects, $k=1, \dots, 22$ industrial groups, $j=1, \dots$, no. of facilities of industrial group k , where *industrial group distance_{ij}* is the distance between subject i and facility j belonging to industrial group k . These new explanatory variables were categorized in concentric rings (0-1, 1-1.5, 1.5-2, 2-2.5, 2.5-3, and 3-30 km as reference). These were included in the models as categorical and continuous variables, and subjects that had some industry other than the group analyzed at ≤ 3 km were excluded.

Supplementary Data, Table S1: list of industrial groups, together with their E-PRTR categories, and number of installations by industrial group and province.

^aNumber of cases.

^bNumber of controls.

^cORs were estimated from various mixed multiple logistic regression models (an independent model for each industrial distance), that included age, sex, body mass index 1-year before the interview, family history of colorectal cancer, tobacco smoking, educational level, physical activity, total energy intake, alcohol consumption, vegetable intake, red/processed meat intake, and province of residence (as a random effect).

^dp-value associated with hypothesis test for the mixed multiple logistic regression model.

^ep-value adjusted by Benjamini & Hochberg's method.

^fp-value adjusted by Benjamini & Yekutieli's method.

Supplementary Data, Table S4: odds ratios of colorectal cancer by industrial distance and industrial group, for the sensitivity analysis with only individuals living in their current residence for ≥ 10 years (long-term residents).

Industrial group (no. industries)	Individuals residing at ≤ 1 km						Individuals residing at ≤ 1.5 km						Individuals residing at ≤ 2 km						Individuals residing at ≤ 2.5 km						Individuals residing at ≤ 3 km

^aNumber of cases.

^bNumber of controls.

^cORs were estimated from various mixed multiple logistic regression models (an independent model for each industrial distance), that included age, sex, body mass index 1-year before the interview, family history of colorectal cancer, tobacco smoking, educational level, physical activity, total energy intake, alcohol consumption, vegetable intake, red/processed meat intake, and province of residence (as a random effect).

^dp-value associated with hypothesis test for the mixed multiple logistic regression model.

^ep-value associated with hypothesis test for the mixed multiple logistic regression model.

^fp-value adjusted by Benjamini & Hochberg's method.

^gp-value adjusted by Benjamini & Yekutieli's method.

Supplementary Data, Table S5: specific pollutants that can be released by the facilities to both air and water, by industrial group, according to the E-PRTR categories.

Industrial group	Pollutants released by industrial groups	
	Air	Water
Combustion installations	NMVOC ^a , arsenic and compounds, cadmium and compounds, chromium and compounds, copper and compounds, mercury and compounds, nickel and compounds, lead and compounds, zinc and compounds, dioxins+furans, trichloroethylene, benzene, PAHs ^b , PM ₁₀ ^c , TSP ^d , manganese, vanadium	Arsenic and compounds, cadmium and compounds, chromium and compounds, copper and compounds, mercury and compounds, nickel and compounds, lead and compounds, zinc and compounds, dioxins+furans, PAHs ^b , toluene, fluoranthene, benzo(g,h,i)perylene
Production and processing of metals	NMVOC ^a , arsenic and compounds, cadmium and compounds, chromium and compounds, copper and compounds, mercury and compounds, nickel and compounds, lead and compounds, zinc and compounds, hexachlorobenzene, lindane, dioxins+furans, polychlorinated biphenyls, anthracene, benzene, naphthalene, PAHs ^b , PM ₁₀ ^c , TSP ^d	Arsenic and compounds, cadmium and compounds, chromium and compounds, copper and compounds, mercury and compounds, nickel and compounds, lead and compounds, zinc and compounds, pentachlorophenol, anthracene, nonylphenol and nonylphenol ethoxylates, naphthalene, organotin compounds, PAHs ^b , octylphenols and octylphenol ethoxylates, fluoranthene, benzo(g,h,i)perylene, benzo(a)pyrene, benzo(b)fluoranthene, benzo(k)fluoranthene, indeno(1,2,3-cd)pyrene
Galvanization	NMVOC ^a , arsenic and compounds, cadmium and compounds, chromium and compounds, copper and compounds, nickel and compounds, lead and compounds, zinc and compounds, dioxins+furans, PM ₁₀ ^c , TSP ^d	Arsenic and compounds, cadmium and compounds, chromium and compounds, copper and compounds, nickel and compounds, lead and compounds, zinc and compounds, PAHs ^b
Surface treatment of metals and plastic	NMVOC ^a , cadmium and compounds, chromium and compounds, copper and compounds, mercury and compounds, nickel and compounds, lead and compounds, zinc and compounds, benzene, dichloromethane, 1,2,3,4,5,6-hexachlorocyclohexane, tetrachloroethylene, trichloroethylene, di-(2-ethyl hexyl) phthalate, PAHs ^b , PM ₁₀ ^c , TSP ^d , manganese, vanadium	Arsenic and compounds, cadmium and compounds, chromium and compounds, copper and compounds, mercury and compounds, nickel and compounds, lead and compounds, zinc and compounds, anthracene, naphthalene, organotin compounds, di-(2-ethyl hexyl) phthalate, PAHs ^b , fluoranthene, trichloromethane, toluene, benzo(b)fluoranthene, ethyl benzene, xylenes
Mining industry	Arsenic and compounds, cadmium and compounds, chromium and compounds, copper and compounds, mercury and compounds, nickel and compounds, lead and compounds, zinc and compounds, NMVOC ^a , PM ₁₀ ^c , TSP ^d	Arsenic and compounds, cadmium and compounds, copper and compounds, nickel and compounds, lead and compounds, zinc and compounds
Cement and lime	NMVOC ^a , arsenic and compounds, cadmium and compounds, chromium and compounds, copper and compounds, mercury and compounds, nickel and compounds, lead and compounds, zinc and compounds, dioxins+furans, polychlorinated biphenyls, anthracene, benzene, naphthalene, di-(2-ethyl hexyl) phthalate, PAHs ^b , PM ₁₀ ^c , TSP ^d , thallium, antimony, cobalt, manganese, vanadium	Copper and compounds, zinc and compounds
Glass and mineral fibers	NMVOC ^a , arsenic and compounds, cadmium and compounds, chromium and compounds, copper and compounds, mercury and compounds, nickel and compounds, lead and compounds, zinc and compounds, dioxins+furans, polychlorinated biphenyls, benzene, PAHs ^b , PM ₁₀ ^c , TSP ^d , manganese, vanadium	Arsenic and compounds, cadmium and compounds, chromium and compounds, copper and compounds, mercury and compounds, nickel and compounds, lead and compounds, zinc and compounds, benzene, ethyl benzene, toluene, xylenes, octylphenols and octylphenol ethoxylates
Ceramic	NMVOC ^a , arsenic and compounds, cadmium and compounds, chromium and compounds, copper and compounds, mercury and compounds, nickel and compounds, lead and compounds, zinc and compounds, benzene, PAHs ^b , PM ₁₀ ^c , TSP ^d , thallium, antimony, cobalt, manganese, vanadium	Arsenic and compounds, cadmium and compounds, chromium and compounds, copper and compounds, mercury and compounds, nickel and compounds, lead and compounds, zinc and compounds, trichloromethane, naphthalene
Organic chemical industry	NMVOC ^a , arsenic and compounds, cadmium and compounds, chromium and compounds, copper and compounds, mercury and compounds, nickel and compounds, lead and compounds, zinc and compounds, 1,2-dichloroethane, dichloromethane, dioxins+furans, tetrachloroethylene, tetrachloromethane, trichloromethane, vinyl chloride, anthracene, benzene, ethylene oxide, naphthalene, PAHs ^b , PM ₁₀ ^c , TSP ^d , antimony, cobalt, manganese, vanadium	Arsenic and compounds, cadmium and compounds, chromium and compounds, copper and compounds, mercury and compounds, nickel and compounds, lead and compounds, zinc and compounds, aldrin, atrazine, chlordane, chlorfenvinphos, chlorpyrifos, DDT, 1,2-dichloroethane, dichloromethane, dieldrin, endosulfan, endrin, hexachlorobenzene, hexachlorobutadiene, 1,2,3,4,5,6-hexachlorocyclohexane, mirex, dioxins+furans, simazine, tetrachloroethylene, trichlorobenzenes, trichloroethylene, trichloromethane, vinyl chloride, anthracene, benzene, brominated diphenylethers, nonylphenol and nonylphenol ethoxylates, ethyl benzene, naphthalene, organotin compounds, di-(2-ethyl hexyl) phthalate, PAHs ^b , toluene, tributyltin and compounds, xylenes, octylphenols and octylphenol ethoxylates, fluoranthene, isodrin, benzo(b)fluoranthene, indeno(g,h,i)perylene
Inorganic chemical industry	NMVOC ^a , arsenic and compounds, cadmium and compounds, chromium and compounds, copper and compounds, mercury and compounds, nickel and compounds, lead and compounds, zinc and compounds, dichloromethane, dioxins+furans, tetrachloromethane, trichloromethane, PM ₁₀ ^c , TSP ^d , antimony	Arsenic and compounds, cadmium and compounds, chromium and compounds, copper and compounds, mercury and compounds, nickel and compounds, lead and compounds, zinc and compounds, hexachlorobenzene, dioxins+furans, trichloromethane, organotin compounds, PAHs ^b , fluoranthene
Fertilizers	NMVOC ^a , zinc and compounds, PM ₁₀ ^c , TSP ^d , cobalt	
Biocides	NMVOC ^a , dichloromethane, PM ₁₀ ^c	Copper and compounds, zinc and compounds, ethyl benzene, xylenes
Pharmaceutical products	NMVOC ^a , arsenic and compounds, cadmium and compounds, chromium and compounds, copper and compounds, mercury and compounds, nickel and compounds, lead and compounds, zinc and	Chromium and compounds, copper and compounds, mercury and compounds, lead and compounds, zinc and compounds, 1,2-dichloroethane, dichloromethane, tetrachloroethylene, tetrachloromethane,

Industrial group	Pollutants released by industrial groups	
	Air	Water
	compounds, 1,2-dichloroethane, dichloromethane, tetrachloromethane, trichloromethane, PM ₁₀ ^c , TSP ^d , thallium, antimony, cobalt, manganese, vanadium	trichloroethylene, trichloromethane, benzene, ethyl benzene, toluene, xylenes, naphthalene, PAHs ^b , fluoranthene, benzo(a)pyrene, benzo(b)fluoranthene, benzo(k)fluoranthene
Explosives and pyrotechnics	NMVOCA ^a , lead and compounds, PM ₁₀ ^c	Arsenic and compounds, cadmium and compounds, chromium and compounds, copper and compounds, mercury and compounds, nickel and compounds, lead and compounds, zinc and compounds
Hazardous waste	NMVOCA ^a , arsenic and compounds, cadmium and compounds, chromium and compounds, copper and compounds, mercury and compounds, nickel and compounds, lead and compounds, zinc and compounds, hexachlorobenzene, dioxins+furans, tetrachloroethylene, trichloroethylene, benzene, PAHs ^b , PM ₁₀ ^c , TSP ^d , thallium, antimony, cobalt, manganese, vanadium	Arsenic and compounds, cadmium and compounds, chromium and compounds, copper and compounds, mercury and compounds, nickel and compounds, lead and compounds, zinc and compounds, dichloromethane, benzene, polychlorinated biphenyls, tetrachloroethylene, trichloroethylene, trichloromethane, ethyl benzene, naphthalene, organotin compounds, PAHs ^b , toluene, xylenes
Non-hazardous waste	NMVOCA ^a , arsenic and compounds, cadmium and compounds, chromium and compounds, copper and compounds, mercury and compounds, nickel and compounds, lead and compounds, zinc and compounds, dioxins+furans, dichloromethane, tetrachloroethylene, tetrachloromethane, trichloroethylene, vinyl chloride, PM ₁₀ ^c , TSP ^d , antimony, cobalt, manganese, vanadium	Arsenic and compounds, cadmium and compounds, chromium and compounds, copper and compounds, mercury and compounds, nickel and compounds, lead and compounds, zinc and compounds, alachlor, aldrin, atrazine, chlordane, chlorfenvinphos, chlorpyrifos, DDT, 1,2-dichloroethane, dichloromethane, dieldrin, diuron, endosulfan, endrin, heptachlor, hexachlorobenzene, hexachlorobutadiene, 1,2,3,4,5,6-hexachlorocyclohexane, lindane, mirex, dioxins+furans, pentachlorobenzene, pentachlorophenol, polychlorinated biphenyls, simazine, tetrachloroethylene, trichlorobenzenes, trichloroethylene, trichloromethane, vinyl chloride, anthracene, benzene, brominated diphenylethers, nonylphenol and nonylphenol ethoxylates, ethyl benzene, isoproturon, naphthalene, organotin compounds, di-(2-ethyl hexyl) phthalate, PAHs ^b , toluene, tributyltin and compounds, triphenyltin and compounds, trifluralin, xylenes, octylphenols and octylphenol ethoxylates, flouranthene, isodrin, hexabromobiphenyl
Disposal or recycling of animal waste	NMVOCA ^a , PAHs ^b , dioxins+furans, PAHs ^b , PM ₁₀ ^c , TSP ^d	Zinc and compounds, dioxins+furans
Urban waste-water treatment plants	NMVOCA ^a , cadmium and compounds, chromium and compounds, copper and compounds, mercury and compounds, nickel and compounds, lead and compounds, dioxins+furans, PM ₁₀ ^c	Arsenic and compounds, cadmium and compounds, chromium and compounds, copper and compounds, mercury and compounds, nickel and compounds, lead and compounds, zinc and compounds, atrazine, 1,2-dichloroethane, diuron, lindane, pentachlorophenol, simazine, tetrachloroethylene, tetrachloromethane, trichloromethane, anthracene, benzene, nonylphenol and nonylphenol ethoxylates, ethyl benzene, isoproturon, naphthalene, organotin compounds, di-(2-ethyl hexyl) phthalate, PAHs ^b , toluene, tributyltin and compounds, xylenes, octylphenols and octylphenol ethoxylates, fluoranthene, benzo(g,h,i)perylene, benzo(a)pyrene, benzo(b)fluoranthene, benzo(k)fluoranthene, indeno(1,2,3-cd)pyrene
Paper and wood production	NMVOCA ^a , arsenic and compounds, cadmium and compounds, chromium and compounds, copper and compounds, mercury and compounds, nickel and compounds, lead and compounds, zinc and compounds, di-(2-ethyl hexyl) phthalate, PM ₁₀ ^c , TSP ^d	Arsenic and compounds, cadmium and compounds, chromium and compounds, copper and compounds, mercury and compounds, nickel and compounds, lead and compounds, zinc and compounds, tetrachloroethylene, trichlorobenzenes, trichloroethylene, trichloromethane, organotin compounds, di-(2-ethyl hexyl) phthalate, PAHs ^b , toluene
Food and beverage sector	NMVOCA ^a , arsenic and compounds, cadmium and compounds, chromium and compounds, copper and compounds, mercury and compounds, nickel and compounds, dioxins+furans, PM ₁₀ ^c , TSP ^d	Chromium and compounds, copper and compounds, mercury and compounds, nickel and compounds, lead and compounds, zinc and compounds, naphthalene, PAHs ^b , toluene, fluoranthene, benzo(g,h,i)perylene, benzo(a)pyrene, benzo(b)fluoranthene
Surface treatment using organic solvents	NMVOCA ^a , chromium and compounds, copper and compounds, nickel and compounds, lead and compounds, zinc and compounds, dichloromethane, naphthalene, PAHs ^b , PM ₁₀ ^c , TSP ^d	Arsenic and compounds, cadmium and compounds, chromium and compounds, copper and compounds, mercury and compounds, nickel and compounds, lead and compounds, zinc and compounds, 1,2-dichloroethane, trichloroethylene, trichloromethane, organotin compounds, toluene, naphthalene, PAHs ^b
Ship building	NMVOCA ^a , cadmium and compounds, chromium and compounds, copper and compounds, nickel and compounds, lead and compounds, zinc and compounds, PM ₁₀ ^c , TSP ^d , antimony, cobalt, manganese	Arsenic and compounds, cadmium and compounds, chromium and compounds, copper and compounds, mercury and compounds, nickel and compounds, lead and compounds, zinc and compounds, organotin compounds, PAHs ^b

^aNon-methane volatile organic compounds.

^bPolycyclic aromatic hydrocarbons.

^cParticulate matter with a diameter between 2.5 and 10 µm.

^dTotal suspended particulate matter.

Supplementary Data, Table S6: amounts (in kg) of carcinogens (IARC classification) and other toxic substances released by the facilities in the study area in 2009, grouped by industrial sector.

Industrial group	IARC groups ^a			Groups of toxic substances ^b

^aIARC carcinogenic classification: Group 1: carcinogenic to humans (arsenic and compounds, cadmium and compounds, chromium and compounds, nickel and compounds, lindane, dioxins+furans, pentachlorophenol, polychlorinated biphenyls, trichloroethylene, vinyl chloride, benzene, ethylene oxide, polycyclic aromatic hydrocarbons (PAHs), particulate matter (PM₁₀), total suspended particulate matter, and benzo(a)pyrene); Group 2A: probably carcinogenic to humans (lead and compounds, aldrin, DDT, dichloromethane, dieldrin, tetrachloroethylene, and hexabromobiphenyl); Group 2B: possibly carcinogenic to humans (chlordane, 1,2-dichloroethane, heptachlor, hexachlorobenzene, 1,2,3,4,5,6-hexachlorocyclohexane, mirex, tetrachloromethane, 1,1,2,2-tetrachloroethane, trichloromethane, ethyl benzene, naphthalene, di-(2-ethyl hexyl) phthalate, cobalt and compounds, benzo(b)fluoranthene, benzo(k)fluoranthene, and indeno(1,2,3-cd)pyrene).

^bMetals (arsenic and compounds, cadmium and compounds, chromium and compounds, copper and compounds, mercury and compounds, nickel and compounds, lead and compounds, zinc and compounds, organotin compounds, tributyltin and compounds, triphenyltin and compounds, thallium, antimony, cobalt, manganese, and vanadium); Pesticides (alachlor, aldrin, atrazine, chlordane, chlorfenvinphos, chlorpyrifos, DDT, dieldrin, diuron, endosulfan, endrin, heptachlor, lindane, mirex, pentachlorobenzene, pentachlorophenol, simazine, tetrachloromethane, isoproturon, organotin compounds, tributyltin and compounds, triphenyltin and compounds, trifluralin, and isodrin); PACs: polycyclic aromatic chemicals (anthracene, ethylene oxide, naphthalene, PAHs, fluoranthene, benzo(g,h,i)perylene, benzo(a)pyrene, benzo(b)fluoranthene, benzo(k)fluoranthene, and indeno(1,2,3-cd)pyrene); Non-HPCs: non-halogenated phenolic chemicals (nonylphenol and nonylphenol ethoxylates, and octylphenols and octylphenol ethoxylates); Plasticizers (di-(2-ethyl hexyl) phthalate, and C₁₀₋₁₃-chloroalkanes); POPs: persistent organic pollutants (aldrin, chlordane, DDT, dieldrin, endosulfan, endrin, heptachlor, hexachlorobenzene, 1,2,3,4,5,6-hexachlorocyclohexane, lindane, mirex, dioxins+furans, pentachlorobenzene, polychlorinated biphenyls, brominated diphenylethers, organotin compounds, PAHs, hexabromobiphenyl, benzo(a)pyrene, benzo(b)fluoranthene, and benzo(k)fluoranthene); VOCs: volatile organic compounds (non-methane volatile organic compounds, 1,2-dichloroethane, dichloromethane, hexachlorobutadiene, tetrachloroethylene, trichlorobenzenes, 1,1,1-trichloroethane, trichloroethylene, trichloromethane, vinyl chloride, benzene, ethyl benzene, ethylene oxide, naphthalene, and toluene); Solvents (1,2-dichloroethane, dichloromethane, tetrachloroethylene, trichlorobenzenes, 1,1,1-trichloroethane, trichloroethylene, trichloromethane, benzene, ethyl benzene, toluene, and xylenes); Other (particulate matter (PM₁₀), and total suspended particulate matter).

Supplementary Data, Table S7: odds ratios of colorectal cancer for ever-decreasing radiuses within a 30-kilometer area surrounding each industrial installation, both overall and by industrial group, for the sensitivity analysis with only individuals living in their current residence for ≥ 10 years (long-term residents).
