

Supplementary Figure 1(SF1): *In vitro* co-infections assay results

Supplementary Figure 1(SF1): “in vitro” co-infections assay results. A. MRT-PCR. results by using mixtures of 20 fg of different DNAs. Each pathogen amplified in its respective channel. B. MC-PCR results by using mixtures of 20 fg of different DNAs. Each pathogen was tested independently. TB: *Mycobacterium tuberculosis*, HC: *Histoplasma capsulatum*, Pj: *Pneumocystis jirovecii* and CN: *Cryptococcus neoformans*.
