

Table S1. Real-time PCR cycle threshold values obtained after the amplification of *Giardia duodenalis*-positive stool samples impregnated in the Whatman® Cards at the storage periods and conditions assessed in the present study.

Whatman® Card	Sample	Ct ¹ value	1 Month			3 Months			6 Months		
			−20 °C	+4 °C	RT	−20 °C	+4 °C	RT	−20 °C	+4 °C	RT

	G353	31.3	30.8	30.5	31.8	31.2	33.4	32.6	30.1	31.3	29.8

¹ Ct: cycle threshold value obtained at the time of diagnosis.

² Sample tested twice to confirm the negative result.
