

Table 3: AMR genes found in temporal subsets of isolate Iso02507. Sequencing data was separated in cumulative subsets defined by sequencing start time of the nanopore reads. These subsets were assembled with scanned for AMR genes with CholeraeNgen. parE – Escherichia coli parE conferring resistance to fluoroquinolones.

Assembly number	Sample	Assembly method	FastANI %	# Genes found	catB9	APH(3')-Ib	APH(6')-Id	CRP	Vibrio cholerae varG	almG	dfrA1	floR	tsmA	sul2	parE
