

Supplemental Figure S11. Trametinib sensitivity of human T-ALL cell lines.

(A) Proliferation of CCRFCEM, JURKAT, HSB2 and MOLT4 cell lines exposed to the indicated concentrations of Trametinib.

(B) Western blot analysis of p-ERK1/2 and total ERK1/2 expression in CCRFCEM and JURKAT cells treated with the indicated concentrations of Trametinib for 24h. GAPDH expression served as a loading control.
