

TEMA DE BÚSQUEDA:

Artículos que traten sobre cáncer colorrectal y enfermedades inflamatorias del intestino

PASOS EN LA ESTRATEGIA DE BÚSQUEDA:

1.- Investigación y búsqueda de la terminología en tesauros: la terminología que vamos a emplear en nuestra estrategia de búsqueda la podemos buscar en los tesauros DeCS, MeSH y Emtree que son específicos del ámbito de las ciencias de la salud.

DeCS (BIREME/OPS/OMS):

https://decs.bvsalud.org/es/ths/resource/?id=23595&filter=ths_exact_term&q=NEOPLASIAS%20COLORRECTALES

https://decs.bvsalud.org/es/ths/resource/?id=23695&filter=ths_exact_term&q=ENFERMEDAD%20INFLAMATORIA%20INTESTINAL

Detalles Estructura jerárquica Conceptos

Descriptor en español:	Neoplasias Colorrectales	Español de España ▼
Descriptor	neoplasias colorrectales	
Término(s) alternativo(s)	cáncer colorrectal tumores colorrectales	
Nota de alcance:	Tumores o cáncer del COLON, del RECTO, o de ambos. Los factores de riesgo del cáncer colorrectal comprenden la COLITIS ULCEROSA crónica, la POLIPOSIS FAMILIAR DEL COLON, la exposición al ASBESTO y la irradiación del CUELLO UTERINO.	
Descriptor en inglés:	Colorectal Neoplasms	

Detalles Estructura jerárquica Conceptos

Descriptor en español:	Enfermedades Inflamatorias del Intestino	Español de España ▼
Descriptor	enfermedad inflamatoria intestinal	
Nota de alcance:	Inflamación inespecífica y crónica, del TUBO DIGESTIVO. Su etiología puede ser genética o ambiental. Este término comprende la ENFERMEDAD DE CROHN y la COLITIS ULCEROSA.	
Descriptor en inglés:	Inflammatory Bowel Diseases	
Descriptor en portugués:	Doenças Inflamatórias Intestinais	
Descriptor en francés:	Maladies inflammatoires intestinales	

MeSH: <https://www.ncbi.nlm.nih.gov/mesh/?term=colorectal+neoplasm>

Colorectal Neoplasms

Descriptor aceptado (lenguaje controlado)

Tumors or cancer of the COLON or the RECTUM or both. Risk factors for colorectal cancer include chronic ULCERATIVE COLITIS; FAMILIAL POLYPOSIS COLI; exposure to ASBESTOS; and irradiation of the CERVIX UTERI.
Year introduced: 1989

Entry Terms:

- Colorectal Neoplasm
- Neoplasm, Colorectal
- Neoplasms, Colorectal
- Colorectal Tumors
- Colorectal Tumor
- Tumor, Colorectal
- Tumors, Colorectal
- Colorectal Cancer
- Cancer, Colorectal
- Cancers, Colorectal
- Colorectal Cancers
- Colorectal Carcinoma
- Carcinoma, Colorectal
- Carcinomas, Colorectal
- Colorectal Carcinomas

Sinónimos (lenguaje libre o natural). Por defecto al buscar en lenguaje controlado busca en todos los sinónimos.

Categoría jerárquica, por defecto al buscar en lenguaje controlado busca en todos los términos específicos que dependen del término más amplio. Para desactivar el “explode” del término, hay que seleccionar la casilla de la ficha del tesoro: “Do not include MeSH terms found below this term in the MeSH hierarchy” o utilizar la etiqueta de campo [Mesh:NoExp]: "Colorectal Neoplasms"[Mesh:NoExp]

For term: **'colorectal tumor'**
Extend your search: Explode As major focus

The Emtree hierarchy for 'colorectal tumor' is as follows:

- Emtree
 - diseases
 - physical disease
 - physical disease by etiology and pathogenesis
 - neoplasm
 - neoplasms subdivided by anatomical site
 - digestive system tumor
 - gastrointestinal tumor
 - intestine tumor
 - large intestine tumor
 - colorectal tumor** (445,703 Records)
 - colon tumor
 - colorectal adenoma
 - colorectal cancer
 - colorectal neuroendocrine tumor
 - rectum tumor

This term was added to Emtree in 2014

2.- Lenguaje controlado (Pubmed, Embase y Cochrane) y libre (todas las bases de datos):

hacemos una tabla en word o excel, con los términos que vamos a utilizar en la búsqueda por lenguaje controlado y libre, ambos lenguajes se complementan. Los descriptores aceptados, son exclusivos de cada tesaurus/base de datos. Los términos del lenguaje libre (entry terms, synonyms, abreviaturas, siglas, palabras clave, etc.) son comunes a todas las bases de datos. Los términos del lenguaje controlado también los utilizaremos en lenguaje libre.

Lenguaje controlado:

| | |
|--|---|
| Colorectal Neoplasms (Pubmed, Cochrane)
colorectal tumor (Embase) | Inflammatory Bowel Diseases (Pubmed, Cochrane)
inflammatory bowel disease (Embase) |
|--|---|

Lenguaje libre (todas las bases de datos): se eliminan los términos duplicados, están ordenados de forma alfabética.

** Aunque en las fichas de DeCS / MeSH el descriptor "Inflammatory bowel diseases", indica en la definición que incluye la ENFERMEDAD DE CROHN y la COLITIS ULCEROSA, en este caso buscaremos estos términos específicos en lenguaje libre, por si aparece en las referencias bibliográficas/citas/registros, por el término específico en vez de "enfermedades inflamatorias del intestino".*

3.- Elaboración de la estrategia de búsqueda utilizando operadores booleanos, de proximidad, truncamiento, búsqueda por frase (comillas), campos, etc.

Para la práctica emplearemos los términos compuestos entrecomillados para que los busque como frases exactas, en todas las bases de datos. No se han aplicado truncamientos, operadores de proximidad, etc. Hay que quitar las comas que pueda haber entre los términos de un término compuesto para que no dé error.

Los términos de una misma materia o concepto irán unidos con el operador OR, mientras que los términos de distintas materias irán unidos con el operador AND.

|---|---|

PUBMED:

Al buscar en campos concretos, al utilizar comillas en términos compuestos o el truncamiento, desactivamos el ATM (Automatic Term Mapping).

En Pubmed solo permite truncar el último término de un término compuesto. Por ejemplo "colorectal cancer*" (no podemos poner el * en "colorectal"). Pubmed-Medline de la plataforma NCBI permite utilizar el operador de adyacencia ~ (virgulilla) en el campo [Title/Abstract]. Ej.: ("colorectal neoplasm"[Title/Abstract:~0]).
