This article has been withdrawn by the authors (although Rocío Jorge, Susana García-Vargas, and Silvia Gutiérrez-Eisman could not be reached, and Natalia Martínez passed away). The authors have become aware of errors in the preparation of Figs. 2A and 3C, where some lanes were erroneously cropped, as well as the Figs. 6A and 8A where some images appear duplicated. The authors state that although replicated experiments performed at the time of the article support the results and conclusions presented in this published paper, they consider that the responsible course of action is to withdraw the article in the interests of maintaining the publication standards of the journal. The authors apologize for any inconvenience they may have caused. The paper with the corrected figures can be obtained by contacting the authors.

The P34G mutation reduces the transforming activity of K-Ras and N-Ras in NIH 3T3 cells but not of H-Ras.
